

PROFESSIONAL SUMMARY

Project Analyst with a Civil Engineering background and an MBA in Project Management, bringing hands-on experience coordinating concurrent projects, schedules, deliverables, and stakeholders. Skilled in Power BI and Excel for project data analysis, KPI reporting, and management dashboards. Demonstrates strong project controls, process standardisation, and cross-functional team coordination, contributing to measurable improvements in project turnaround and delivery. Transitioning toward Project Coordinator and PMO Analyst roles in Dublin, Ireland, with a focus on schedule and risk management.

CORE SKILLS

Project Coordination: End-to-End Project Coordination, Project Planning, Schedule & Milestone Tracking, Deliverables, Dependencies, Change & Variation Management, Project Handover
Stakeholder & Team Management: Stakeholder Management, Cross-Functional Coordination, Contractor/Vendor Coordination, Meeting Management, Action Tracking, Escalation
Reporting & Analysis: Power BI, Microsoft Excel, Forecast vs Actual, KPI Reporting, Project Status Reports, Data Analysis, Cost & Progress Tracking, Management Reporting
Project Controls & Process Improvement: RAID Logs, Risk & Issue Management, Resource & Capacity Tracking, Process Standardisation, SOP Documentation, Root Cause Analysis, Best Practice Implementation
Tools & Methods: Microsoft Project, Jira, Microsoft Teams, Agile, Scrum, Kanban, Waterfall

WORK EXPERIENCE

Project Analyst, Luna Software Solutions Mar 2024 – Dec 2024

- Coordinated multiple concurrent projects by tracking critical dates, scope, cost, schedules, dependencies, resources, and deliverables to provide accurate updates for weekly stakeholder reviews.
- Developed and maintained Power BI and Excel dashboards to consolidate project progress, cost, capacity, risks, and forecast-versus-actual data for management decision-making.
- Analysed project data to identify schedule variances, delivery discrepancies, resource constraints, and cost impacts, escalating issues and coordinating corrective actions with delivery teams.
- Coordinated project changes and variations through documentation, stakeholder review, impact tracking, and closure, ensuring agreed changes were reflected in project records and delivery plans.
- Validated status, cost, schedule, and progress information to maintain accurate project data and reporting records for management reports.
- Coordinated cross-functional go-live and handover activities by managing testing, outstanding actions, documentation, and stakeholder sign-off against requirements.
- Standardised project documentation, reporting templates, and process controls, contributing to a 25% reduction in project turnaround time through improved process discipline.
- Delivered practical training to team members on reporting dashboards, project tracking processes, and new systems to improve consistency and data accuracy.

Project Coordinator, Luna Software Solutions Jul 2022 – Feb 2024

- Coordinated project activities from planning through delivery by tracking critical dates, milestones, dependencies, resources, costs, and deliverables across multidisciplinary workstreams.
- Maintained Excel-based project trackers for progress, cost, capacity, delivery status, and outstanding actions, consolidating information for project and management reporting.
- Coordinated requirements and specifications between stakeholders, contractors, vendors, and delivery teams to ensure scope, changes, responsibilities, and deadlines were clearly documented.
- Monitored project schedules and dependencies, identifying potential timeline, resource, and delivery risks early and escalating issues requiring management intervention.
- Managed RAID logs for assigned workstreams by recording risks, assumptions, issues, dependencies, owners, target dates, and resolution actions.
- Prepared project meetings, captured decisions and actions, and followed up with stakeholders to maintain accountability against agreed deadlines.
- Built Power BI and Excel reporting dashboards to track project progress, cost, change/variation status, deliverables, sign-off, and invoicing information.
- Used Microsoft Teams to coordinate distributed stakeholders and communicate project status, risks, changes, priorities, and

- required actions.
- Improved project coordination processes by maintaining standard templates, documentation, and compliance records to support consistent best-practice working across project activities.

SELECTED PROJECTS

Project Performance & Management Reporting Dashboard

- Developed a Power BI and Excel dashboard to consolidate project progress, cost, capacity, risks, and forecast-versus-actual data.
- Structured reporting around regular stakeholder reviews to improve visibility of project performance and outstanding actions.
- Tools Used:** Power BI, Microsoft Excel

Civil Engineering Groundwater Contamination Study

- Completed a Civil Engineering project investigating groundwater contamination in Pallikaranai, Chennai.
- Coordinated data collection, analysis, technical documentation, and presentation of findings using structured project planning and reporting practices.

EDUCATION

Dublin Business School, Master of Business Administration – Project Management	2024 – 2025
Bharath Institute of Higher Education and Research, Bachelor of Technology – Civil Engineering	2018 – 2022
